

The Canadian Nuclear Structure Community would like to thank you Robert for your strong support of ISAC

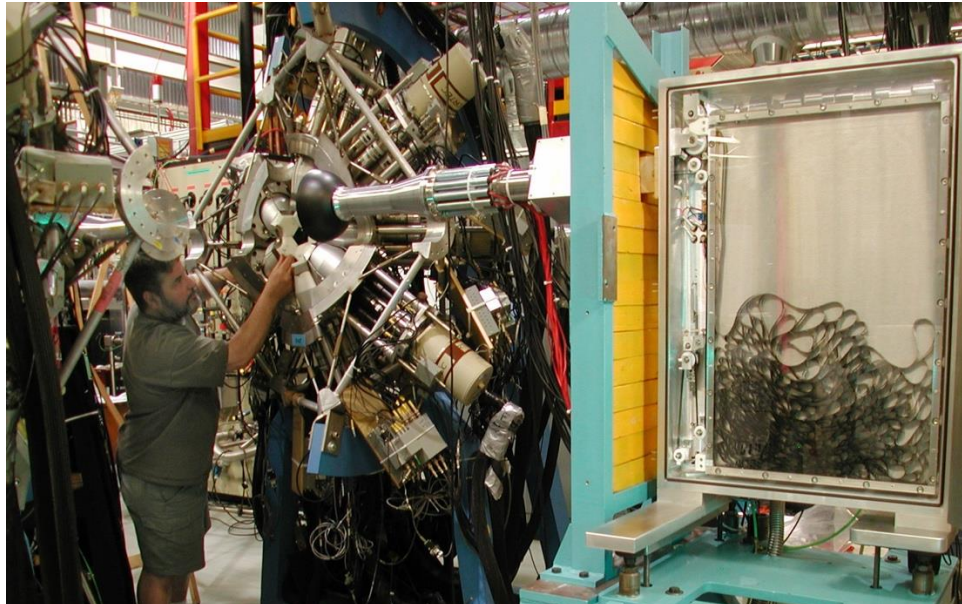

The  
ISAC-I  
Hall in  
1999

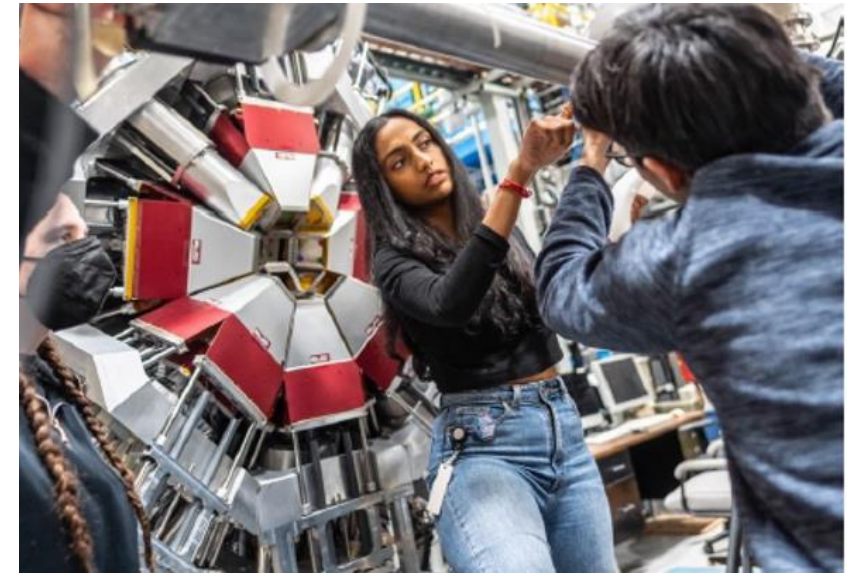

TIGRESS was  
funded in 2003  
for studies with  
accelerated RIB  
at ISAC-II  
First Experiment  
Coulex of  $^{29}\text{Na}$   
in 2007

IN 2000 the  
 $8\pi$   
spectrometer  
was moved to  
TRIUMF and  
optimized for  
 $\beta$ -decay  
studies at  
ISAC-I

The  $8\pi$   
was  
replaced  
with  
GRIFFIN  
in 2014

Congratulations Robert, as the Edward G. Bilpuch Distinguished Professor, Emeritus I am sure there are many exciting discoveries still to come. Shirley and I wish you and Claire many happy years spent together with family and friends. Thanks for the memories. We are looking forward to seeing you both at NS2026 in Vancouver
